Updated January 18, 2012

How this Section of the Website Works:

I have created a network of realtors across the province with whom I work. These realtors are retired nurses, physiotherapists, occupational therapists or have other backgrounds working with people with special needs.

Buying a House

When someone contacts me about one of these listings, I can refer them to the realtor in my network that works in that part of Ontario. If you are already working with a realtor, with a signed Agency Relationship, then I must work only with your realtor. In that case, please have your realtor contact me directly.

Selling A House

Only the listings that I am directly involved with are highlighted in this section. If you want to sell your accessible house or condo and you do not yet have a realtor, you can contact me. I can co-list your house with a knowledgeable realtor who is in your geographical area. Your house would be highlighted in this section with pictures and a full description.
